

eneco-xxx-xxxxxx:/usr/downloads# ./update-rooted.sh

=====
=====

Welcome to the rooted Toon upgrade script. This script will try to upgrade your Toon using your original connection with Eneco. It will start the VPN if necessary.

Please be advised that running this script is at your own risk!

Version: 3.42 - TheHogNL & TerrorSource & yjb - 21-12-2018

=====
=====

You are currently running version 3.2.18 on a qb2 with flavour ene

Available versions: 1.0.9 1.9.10 2.1.0 2.2.24 2.3.17 2.3.29 2.3.36 2.4.7 2.4.12 2.5.11 2.5.14 2.5.18

4.13.7 4.15.2 4.15.6 4.16.8 4.18.8 4.19.10 4.20.7 4.22.7

Which version do you want to upgrade to?

4.10.6

Alright, I will try to upgrade to 4.10.6

Now starting the VPN tunnel and waiting for it to be alive and configured...

Now starting the VPN tunnel and waiting for it to be alive and configured...

Tunnel is alive and configured.

Upgrade script downloaded. We need to download the upgrade files first. No upgrade is done yet. Do you want me to download the files (yes) or quit (anything else)?

yes

Starting the upgrade prepare option which downloads all necessary files. No upgrade is done yet.

Progress: 100% ..

Prepare failed. Please check the logs at /HCBv2/tmp/opkg-cache/upgrade-qb2.sh.log

Quitting the upgrade. It was a nice try tho...
